

PRE-ASSEMBLED QUICK INSTALLATION SAFETY RAILING KIT

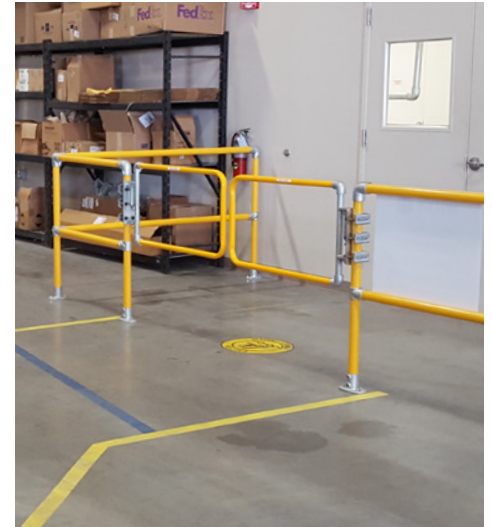

The FlexKit railing system is an easily assembled, sturdy railing system that requires no welding or threading. Installation is fast due to the system's pre-assembled components. Elbows, crosses and tees arrive prefitted to the upright pipes. Almost any standard railing configuration can be achieved with FlexKit by ordering the right combination of kit components.

FEATURES AND BENEFITS

- ▲ Available Immediately FlexKits are modular pre-manufactured systems.
- ▲ OSHA Compliant FlexKit meets or exceeds OSHA and BOCA standards.
- ▲ Sturdy & Reliable FlexKits are corrosion resistant and made with durable fittings.
- ▲ Highly Visible Pipe is powder coated in safety yellow for maximum visibility (Also available in galvanized Iron/Steel or Aluminum).
- ▲ Quick Setup FlexKits are easily assembled with a standard hex tool.
- ▲ Low System Cost FlexKits are cost efficient.

FLEXKIT APPLICATIONS

Warehouse Railing

For warehouse safety, railing can be installed very quickly. The uprights arrive pre-assembled. Simply mount the bases to the floor, attach the horizontal railing pipes and the railing is ready for use. Each section is designed with industry standard 1-1/2" pipe, exceeding OSHA top rail load requirements. The railing can also be easily removed when necessary.

Loading Dock Railing

FlexKit Railing Systems can be used in a variety of applications including loading docks. Safety railing can be used to protect people from falling from the end of the dock. In the event of a distracted driver damaging the railing, a replacement section can be quickly ordered and implemented without expensive welding work.
