MOBILE A-FRAME SYSTEM (MAFS)

The Flexible Lifeline Systems Mobile A-Frame System (MAFS) allows you to place mobile overhead anchor points where you need them in your workplace. These systems roll over equipment or other structures being accessed, and provide ground-up fall protection for your elevated work activities. The built in horizontal rail affords the simplicity of a rail-and-trolley system while allowing users a full range-of-motion over the work area, keeping your workers safe without interfering with their jobs.

FLS WORKS®

MOBILE A-FRAME SYSTEM (MAFS)

FEATURES

- **Versatility** the A-frame can be utilized over a variety of equipment, vehicles and structures.
- **Lightweight** Easily moved by hand
- **Customizable** to suit your specific application needs
